***An Industry Leader in Multi-Oil Heating Raises the Standard Again:
Firelake Manufacturing Introduces An Industry First....***

LIFETIME WARRANTY

ON ALL HORIZON™ MULTI-OIL HEATERS

Dassel, MN... Mason Smith, Firelake Manufacturing Corporate Sales Manager, announces an industry first and only limited lifetime warranty on its line of Horizon Multi-Oil Heaters.

"We're very excited about launching another industry first with the lifetime warranty" said Smith. "This shows our customers that we are committed to them and we stand behind our manufacturing quality." said Smith.

Firelake's flagship Horizon line has been updated with an array of new technology including a multi-start control, a high-voltage igniter and a backup safety

feature for over firing. Additional design innovations include a flame sight port for easy access, larger blowers with more CFM's, symmetrical mounting brackets for easier installation, and pre-painted steel cabinet construction for a more durable and polished finish.

All of Firelake's Horizon heaters include the tubeless heat exchanger, targetless design, clean-out tool, and dual stack connections for easy installations.

This warranty, as well as a helpful savings calculator, can be found on Firelake's website — www.firelakemfg.com

Firelake manufactures the complete line of SHENANDOAH® waste oil heating equipment and markets used-oil heaters throughout the US and Canada. The family- owned and operated business is located in Dassel, MN, with sales and marketing offices in Mt. Crawford, Virginia
